

PE

Before we start

- Set your name on Zoom to your name as it appears on LumiNUS
 - Format: [PC] John Doe on the PC/laptop OR John Doe on the phone
- Team to test: given in the zip file with your name
- Download the PE files to test and latest CATcher (if you haven't done so already). PE files to test distributed via nBox folder (see announcement)
- Read PE instructions in the module website.

IMPORTANT: Ensure you are using **Java 11** for testing the assigned JAR

If you need to use angle brackets (i.e., < >) in your bug report, use HTML equivalents `<` and `>` instead. Angle brackets are stripped out as 'unsafe' by CATcher/GitHub.

During (Part 1)

Duration: 60 minutes (~4:10pm to ~5:10pm)

- Launch CATcher and login to the **CS2113/T PE** profile
- Test the product and report bugs via CATcher
- If the allocated product fails catastrophically (e.g. crashes during launch), or doesn't work at all ping Prof for the fallback option
- If you need to talk to Akshay, ping on MSTEams

Not allowed during exam period:

- Communication with others (except invigilators)
- Using software or websites other than those strictly required for the PE.

During (Part 2)

Duration: 30 minutes (~5:15pm to ~5:45pm)

- Evaluate the quality of the documents. Report bugs on UG/DG only

Part 3

Duration: 15 minutes (between ~5:45pm to end of the day)

- Submit your overall evaluation via TEAMMATES.

If you tested a fallback team, please confirm with Akshay before leaving.
